

Deekshith A

Bangalore, India | d33kshith@proton.me | LinkedIn | GitHub | Portfolio | TryHackMe

PROFESSIONAL SUMMARY

Cybersecurity professional with hands-on experience in offensive and defensive security operations. Skilled in penetration testing, vulnerability assessment, and incident response. Proficient in Red Teaming, Social Engineering, and Digital Forensics. Active CTF player and offensive lab creator, ranked in the top 2% globally on TryHackMe. Experienced with industry frameworks including OWASP Top 10, CMMC, HIPAA, and ISO 27001.

TECHNICAL SKILLS

AI: Automation, Agentic Workflows, RAG, LLM, AI Jailbreaking, Guardrail Bypass Testing, AI-Assisted Offensive Security
Offensive Security: Penetration Testing, Web Application Security, Network Exploitation, Social Engineering, Red Teaming, Phishing Campaigns, OWASP Top 10, Active Directory Attacks
Threat Intelligence: Dark Web Monitoring, OSINT, Threat Actor Tracking, Leaked Credential Monitoring
Defensive Security: SIEM & Log Analysis, Incident Response, Digital Forensics, Malware Analysis, Threat Modeling, Vulnerability Assessment
Programming & Scripting: Python, Bash, JavaScript, C/C++, x86 Assembly, PowerShell, SQL
Tools & Platforms: Kali Linux, Burp Suite, Metasploit, Nmap, Wireshark, ELK Stack, Docker, Kubernetes, Hashcat, VirtualBox, Volatility, Autopsy, OpenSSL, Git, AWS, GCP
Red Team Tooling: Ligolo-ng, BeEF, WiFi Pineapple (Raspberry Pi 4 Build), BadUSB (Raspberry Pi Pico), evilginx
Frameworks & Standards: CMMC, HIPAA, ISO 27001, NIST, Secure SDLC, SAST/DAST, CI/CD Security

CERTIFICATIONS

CPENT: Certified Penetration Testing Professional, EC-Council
IIT Guwahati: Cybersecurity Course (Degree)
TryHackMe: Jr Penetration Tester
TryHackMe: PreSecurity
Cisco / Cisco Networking Academy: Ethical Hacker & Cybersecurity Essentials
IISc Bangalore: Ethical Hacking
OPSWAT Academy: Critical Infrastructure Protection
Deloitte Australia: Cyber Job Simulation
TCS: Cybersecurity Analyst – Identity and Access Management (IAM)
UVCE GA: Cyber Intelligence
MARVEL, UVCE: MARVELOps Docker 101 Workshop

EXPERIENCE

Cybersecurity Intern (Ethical Hacking)	2025
<i>Human Initials</i>	<i>Bangalore (Remote), India</i>
– Identified and mitigated security risks across enterprise network infrastructures, reducing attack surface exposure. – Conducted comprehensive vulnerability scans and security posture assessments using industry-standard tools. – Collaborated with cross-functional teams to develop and deploy active incident response strategies.	
Independent Security Researcher	Mar 2025 – May 2025
<i>Solo (Private, Invitation-Based Engagement)</i>	<i>Remote</i>
– Invited as a solo researcher to a private, invitation-only vulnerability testing engagement. – Identified 8 vulnerabilities (1 critical, 1 high, 2 medium, 4 low severity) through manual testing and analysis; engagement and target details withheld under NDA.	
Member, Cloud & Cybersecurity Domain	2025 – Present
<i>MARVEL, Research and Development Wing, UVCE</i>	<i>Bangalore, India</i>
– Core member of the Syllabus and Task Design team for the Cloud and Cybersecurity domain. – Completed the L2 Path in Cloud & Cybersecurity operations, covering core security principles and cloud architectures. – Conducted research on cloud security architecture and network defense mechanisms. – Collaborated with peers to develop security tools and manage experimental security labs.	

Cybersecurity Workshop Facilitator

2025

Independent

Bangalore & Tumkur, India

- Conducted a cybersecurity awareness workshop at Sarvodaya PU College, Tumkur, for approximately 100 attendees, covering foundational concepts in network security, threat landscapes, and safe digital practices.
- Delivered a 4-session ethical hacking workshop series at UVCE, Bangalore, to approximately 160 attendees, covering reconnaissance, exploitation techniques, web application attacks, and responsible disclosure.
- Built and published a certificate verification platform (h4cking-certificate-verification.vercel.app) hosting workshop resources and attendee certificate validation.
- Designed hands-on lab exercises and learning materials to give participants practical exposure to real-world attack and defense scenarios.
- Ran hardware-based red-teaming awareness demonstrations, including BadUSB attacks (Raspberry Pi Pico) and rogue access point attacks (WiFi Pineapple on Raspberry Pi 4), to illustrate physical and wireless attack vectors.

Member, Factory Data Reconciliation Project

Mar 2026 – Present

Numocity (Mentored by Sudeep Prasad, VP)

Bangalore (Remote), India

- Collaborating on a 5-member team on a factory data reconciliation project, mentored by Sudeep Prasad, VP at Numocity.
- Analyzing real factory data to support planning decisions and identify anomalies, applying a data analyst/data science approach to production data.
- Setting up secure, cost-efficient data pipeline infrastructure to support reliable ingestion and processing of factory data.

KEY PROJECTS

Perimeter Security Architecture – Zero-Trust Network Design | *ELK Stack, SIEM* | Link 2025

- Redesigned a zero-trust network architecture for a cryptocurrency exchange with multi-zone segmentation and DMZ.
- Implemented continuous security monitoring using the ELK Stack for real-time threat detection and response.

Security Assessment | *SAST, DAST, Secure SDLC* | Link 2025

- Conducted a strategic security audit integrating Secure SDLC practices with SAST/DAST testing methodologies.
- Implemented CI/CD security layers to enforce code integrity and vulnerability detection throughout the pipeline.

Data Security Framework | *C++, AES, RSA, SHA-256* | Link 2025

- Built a data security framework using custom C++ scripts implementing AES/RSA encryption and SHA-256 integrity verification.
- Applied data masking techniques to ensure compliance with relevant regulatory requirements.

Compliance Assessment & Hardening | *CMMC, HIPAA, ISO 27001* | Link 2025

- Executed a cybersecurity and compliance redesign for hybrid environments, focusing on enterprise-wide system hardening.
- Aligned security controls to CMMC, HIPAA, and ISO 27001 framework standards.

E-D-Crypto Utility | *C, OpenSSL, AES-256-CBC, RSA-2048* | Link 2024

- Developed a C-based file encryption/decryption utility using AES-256-CBC, RSA-2048 (OAEP), and SHA-256 integrity checks via OpenSSL.

CTF & OFFENSIVE LABS

TryHackMe: Ranked in the top 2% globally on the TryHackMe leaderboard; maintaining an ongoing 100+ day daily activity streak.

Regular CTF Player: Active participant in Capture-the-Flag competitions across web exploitation, network penetration, and reverse engineering categories.

Offensive Lab Creator: Regularly designs and builds custom offensive security labs and CTF-style challenges for hands-on skill practice and workshop training.

Threat Intelligence Research: Seasoned dark web researcher, monitoring and OSINT research to track threat actor activity and exposed credentials, applying safe and controlled research practices throughout.

EDUCATION

University Visvesvaraya College of Engineering (UVCE)

2024 – 2028

Bachelor of Technology in Computer Science and Engineering

Bangalore, India
